

# Use good sense practice good hygiene

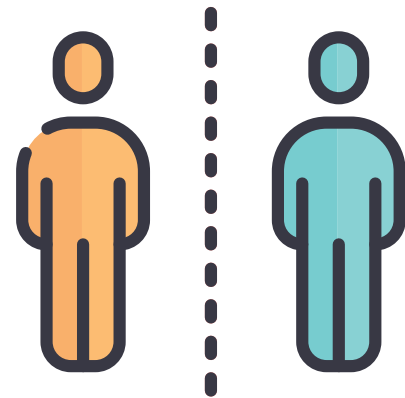

when operating machines.

## Best Practices for **LOCATIONS**

Wash your hands often with soap and water for at least 20 seconds. Use alcohol-based sanitizer if washing hands is not available.

recommended social distancing of 6 feet or install plexiglass shields/dividers.

Comply with all applicable and current laws and regulations.

- Clean and disinfect frequently touched objects and surfaces, especially touch screens, keypads, coin entry parts, joy sticks, buttons and any part that is used often.
- Install plexiglass or dividers between machines for recommended social distancing.
- Cough into a tissue and throw it away and wash your hands; or cough into your elbow - NOT your hand.
- Wear gloves and a mask.
